

28 April 1989

DA WEEKLY REPORT HIGHLIGHTS

- OFM did not provide a report this week.

25X1

- Representatives of the Office of Personnel attended the 14th National Conference on Blacks in Higher Education. Approximately 4,000 high school students from Maryland, Virginia, Delaware, and the District of Columbia visited the Agency's exhibit. As a follow-up to this conference, the Agency invited Dr. Frederick Humphries, President of Florida A&M University, and Dr. James Hefner, President of Jackson State University, to visit Headquarters for briefings.
- The Office of Logistics (OL) has completed the installation of an Infrared Sound Amplification System for the Headquarters Auditorium. This system is designed to transmit a signal from the auditorium sound system to a receiver in headphones which are worn by hearing-impaired individuals.
- OL has placed picnic tables and benches in the courtyard between the Original and New Headquarters Buildings and starting this week food carts will be selling hot dogs, nachos, canned soda, and ice cream.
- The Office of Medical Services (OMS) held its annual health fair on 20 and 21 April. Several thousand employees perused the exhibits on such topics as home

~~SECRET~~

and office safety precautions, maintaining a healthy heart, total body fitness, and diet counseling. OMS completed over 700 health screenings during the fair, including 135 glaucoma tests, 112 diabetes tests, 94 cholesterol tests, and over 400 blood pressure readings. The tests uncovered 6 unknown cases of glaucoma, 25 abnormally high glucose levels, and 34 high cholesterol levels.

- The Office of Information Technology has completed two major installation projects with the Contel Company. One provided integrated voice and data services for the Original and New Headquarters Building and involved the installation of six PBX switches [REDACTED]
